Linux WLAN FAQ

v1.75, 6 march 2000

1. Preface

    1.1 A word from the maintainer of this FAQ.

    1.2 Where can I find the latest edition of this FAQ?

    1.3 What is a FAQ?

2. General information.

    2.1 What is the Linux WLAN project, anyway?

    2.2 Why would I want a wireless LAN?

    2.3 What is the best WLAN card?

    2.4 What cards are supported and which aren't?

    2.5 What is IEEE 802.11?

3. Compiling and installing.

Drop.org

American democracy is taking a step forward.

Submitted by Dibbit on Sunday, December 03rd, 2000 - 16:47 Politics & Freedom

In the light of America's failure to elect a President, The Queen of England has given notice to the revocation of their independence. The revocation containing this notice also included some rules that are to be introduced in America.

Drupal 1.0.0 released on January 15, 2001

Today, drop.org announces the release of Drupal 1.00 after an extensive period of testing. Drupal is a full-featured content management/discussion engine using Apache/PHP/MySQL and suitable to setup a news-driven community or portal site similar to kuro5hin.org and slashdot.org. Current features include discussion forums, web-based administration, theme support, an open submission queue, content management, a modularized design, PHP sessions, user management with access control and username/profanity/hostname filters, error logging, a public diary module, an affiliate site module, backend/headline generation (RSS/RDF) and much more.

Hey Jeremy,

after having read http://www.kerneltrap.com/article.php?sid=496, I decided I'd let you know about the Drupal engine [1] as a replacement for PHPNuke: you can see Drupal in action at http://www.drop.org/ [2] and you can learn more about it at [3]. If you'd like to get an idea of how the admin pages look like and what sort of things can be configured, drop me a line, and I can give you temporary admin access to drop.org. Like that you don't have to install it yourself. [Note: I'm the main Drupal developer.]

> hear your opinion on several of the other engines, if you're up to it.

Thatware, PHP-Nuke, PHPweblog, Geeklog and daCode are all crap. Most, with PHP-Nuke being the /best/ example, look nice from the outside but once you look under the hood, things gets real ugly, real soon.

Okay, I gave administrator priveleges to jeremy@kerneltrap.com:

http://www.drop.org/admin.php

Please be gentle because it is a real-life site. Feel free to poke around but don't make too many changes without undoing them. Thanks.

Dries,

This email changed my life... thank you!

-Jeremy

Drupal engine

Submitted by kika@trip.ee on Monday, January 21, 2002 - 16:09

Project description

Drupal is the English pronunciation for the Dutch word 'druppel' which stands for 'drop'. Drupal is a content management/discussion engine suitable to setup or build a content driven or community driven website. We aim towards easy installation, excessive configuration and fine-grained maintenance capabilities. Due to its modular design Drupal is flexible and easy to adapt or extend. Drupal is written using PHP. The source code is available under terms of the GNU General Public License (GPL).

Mission statement

To develop a leading edge open-source content management system that implements the latest thinking in community publishing, knowledge management, and software design. We value flexibility, simplicity, and utility in our product; teamwork, innovation, and openness in our community; and modularity, extensibility and maintainability in our code.

Writing
Tests for
Drupal 8

Running SimpleTests

Processed test 144 of 178 - *Registry parse file test*. **80%**

Overall results: 7603 passes, 0 fails, and 0 exceptions

- Registry parse file test: 3 passes, 0 fails, and 0 exceptions
- Graph: 30 passes, 0 fails, and 0 exceptions
- Valid Url: 79 passes, 0 fails, and 0 exceptions
- Drupal error handlers: 23 passes, 0 fails, and 0 exceptions
- Drupal render: 1 pass, 0 fails, and 0 exceptions
- JavaScript: 18 passes, 0 fails, and 0 exceptions
- Drupal set/get content: 10 passes, 0 fails, and 0 exceptions
- Drupal HTTP request: 19 passes, 0 fails, and 0 exceptions
- Cascading stylesheets: 4 passes, 0 fails, and 0 exceptions
- Drupal tags handling: 8 passes, 0 fails, and 0 exceptions
- Size parsing test: 35 passes, 0 fails, and 0 exceptions
- Tests for the l() function: 1 pass, 0 fails, and 0 exceptions
- Actions configuration: 42 passes, 0 fails, and 0 exceptions
- Syslog functionality: 18 passes, 0 fails, and 0 exceptions
- Top visitor blocking: 36 passes, 0 fails, and 0 exceptions
- SimpleTest error collecter: 15 passes, 0 fails, and 0 exceptions
- SimpleTest functionality: 82 passes, 0 fails, and 0 exceptions
- Session tests: 178 passes, 0 fails, and 0 exceptions
- Block availability: 20 passes, 0 fails, and 0 exceptions

How well are we doing?

- About 10,000 tests
- Total files covered: more than 75% (nice!)
- Total coverage: 78% (pretty good!)
- 100% test passing (awesome!)

Database abstraction layer

- Support for master/slave replication
- Support for transactions
- Database specific optimizations
    - Multi-insert queries
    - Delayed insert queries
- Better portability
    - SQLite support
    - PostgreSQL support
- Functional tests
- And more ...

Other ponies that are nice to have ...

- OAuth support
- Job queues
- RDFa output
- Real-time messaging (XMPP)
- Activity log

The web isn’t all that old yet ...

... can you imagine what it will look like in another 20 years?

Start thinking of it internet as one machine

- Linking machines
- Linking pages
- Linking data
- Linking things

Kevin Kelly calls this the “One Machine”
Tim Berners Lee calls this the “Giant Global Graph”
Others call this “Web 3.0”

- OAuth support
- Job queues
- RDFa output
- Real-time messaging (XMPP)
- Activity log

A movement needs a mission

There is a difference between telling people what to do and creating a movement

A movement needs a healthy ecosystem

A movement needs leaders

thank
you
