The Slashdot effect

PINE 4.58 MESSAGE TEXT Folder: INBOX Message 1 of 3 ALL ANS

Date: Tue, 9 Mar 2005 10:28:36 +0200 (SAST)
From: Dries Buytaert <dries.buytaert@*****.com>
To: Jeremy Andrews
Subject: Drupal as a replacement for PHPNuke

Hey Jeremy,

After having read http://www.kerneltrap.com/article.php?sid=496, I

drop me a line, and I can give you temporary admin access to drop.org. Like that you don't have to install it yourself. [Note: I'm the main Drupal developer.]

easily add your own.

[1] http://www.drupal.org/
[2] http://www.drop.org/
[3] http://www.drop.org/node.php?id=703

Amongst other things, I'm *really* into the weblog development scene (it is a hobby), so if you want my opinion on any of the existing weblog tools (such as PHPNuke, PostNuke, Geeklog, DaCode, Scoop, Slash, Drupal, Zope, etc.), just ask.

Introducing Mozilla

Firefox 1.0

Are you fed up with your web browser?

You're not alone. We want you to know that there *is* an alternative...

"I installed Firefox on my laptop today. It's *so* fast — I never knew there could be that much of a difference."

— Stephen Cropp, New Zealand

"I was tired of my browser crashing everyday, so I tried Firefox. Now I can't live without it. Pop-up blocking, secure browsing and no spyware. Best of all... not a crash since I switched."

— Justin Henderson, USA

"I thought changing and learning a new web browser would be difficult, but with Firefox I had no problems at all. Browsing is now smooth."

— Jouni Hätinen, Finland

Firefox is the free, open source web browser from the Mozilla Foundation that lets you surf faster and more efficiently and helps avoid annoying pop-ups and spyware. Join us and make the switch today — Firefox imports your Favorites, settings and other information, so there's nothing to lose.

Find out what more than 10 million users from around the world already know: there *is* an alternative!

ABOUT CAPGEMINI

We've been working with Drupal since 2007 and believe that Drupal is often the best and most cost effective solution for our customers to build their online presence and business. That's also why we internally chose Drupal to power our knowledge management tool.

We thoughtfully combine onshore with offshore development to assure that the end result is both high quality and cost optimal. To deliver large and complex websites we can leverage our people's knowledge of Drupal as well as our extensive experience with solving problems in the enterprise world. All this makes Capgemini a capable and reliable partner to help enterprises successfully exploit the power of Drupal and its community.
