Drupal Starshot: Igniting Drupal's next phase of growth and adoption

Drupal Starshot:

Our boldest mission in 24 years

500+ people pledged
ways they could contribute to
making Drupal Starshot a reality!

We're halfway there!

8 months, not 8 years

A blue-toned illustration of a futuristic alien landscape. In the center, a large, multi-tiered flying saucer hovers in the air. To the left, a tall, spire-like structure with several circular platforms extends upwards. The ground is a flat, rocky plain with some sparse, alien-looking vegetation. In the foreground, a few small figures of people are walking across the landscape. The sky is filled with stars and a large, prominent planet or moon. The overall scene is a classic sci-fi depiction of an alien world.

What happened since DrupalCon Portland?

A man in a flight suit is piloting a spacecraft, looking out the window. The cockpit is filled with various instruments and controls. The entire image has a blue tint.

My first mission:

Alter the fabric of time and space

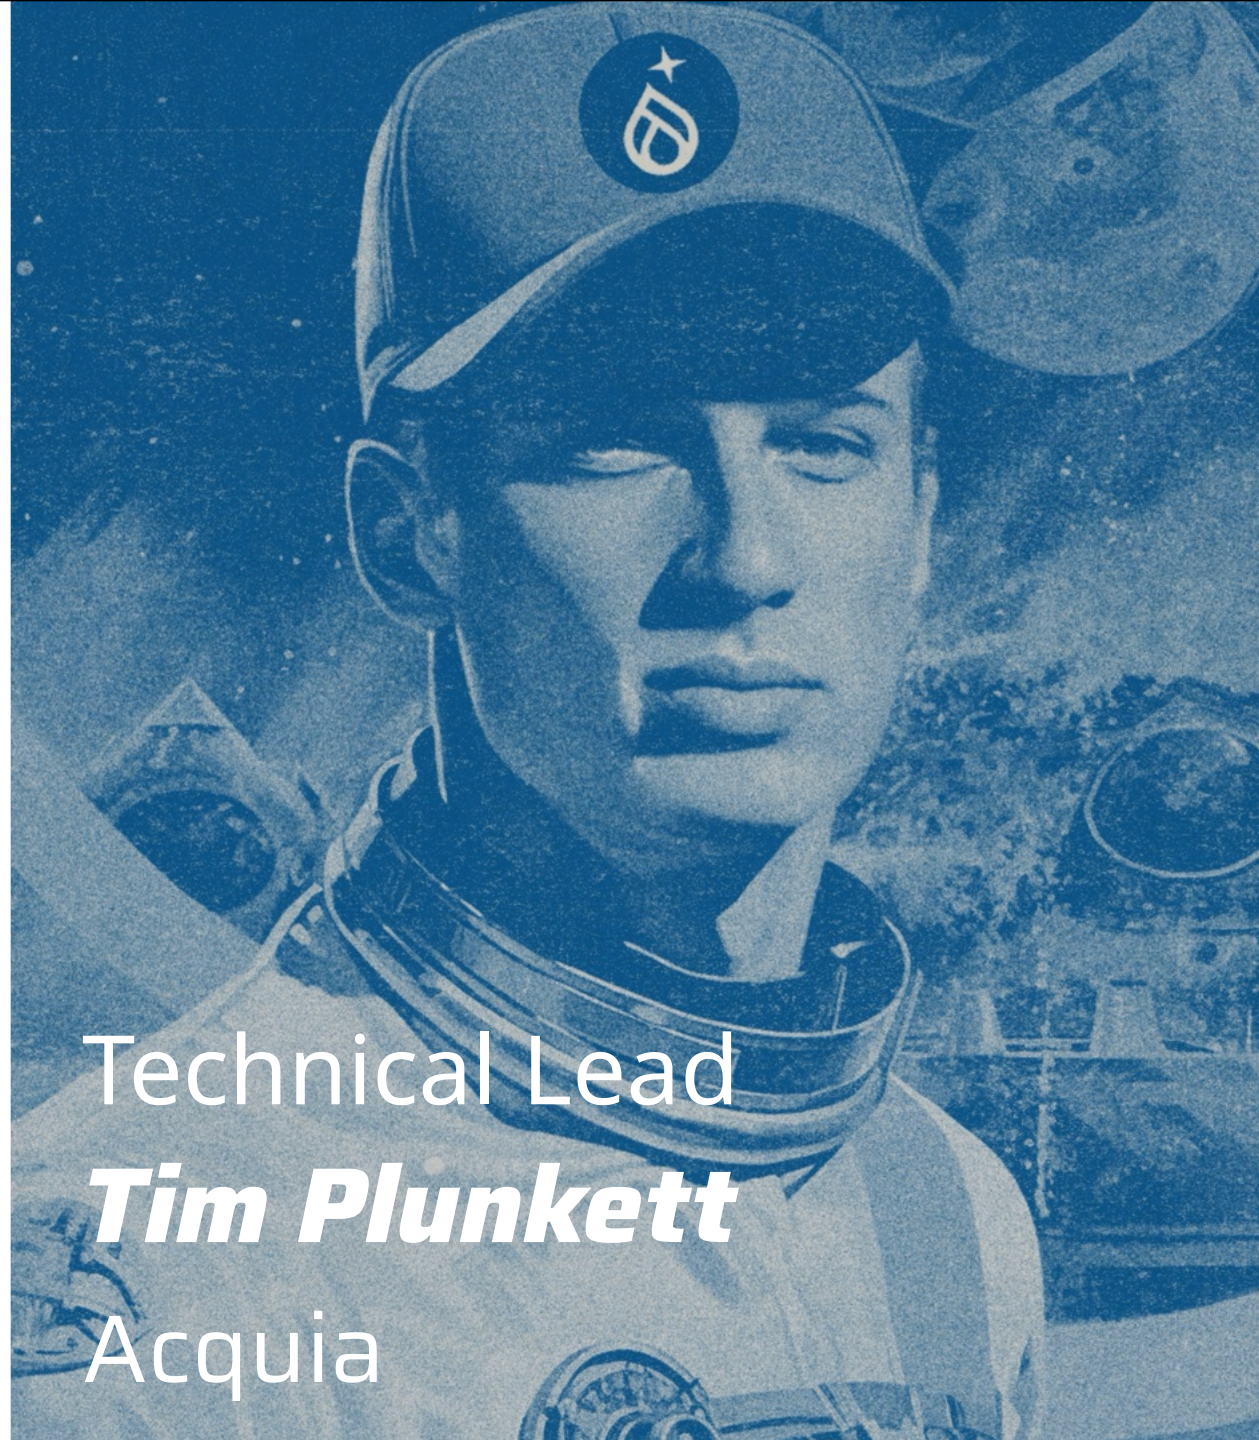

My second mission:

Assemble a leadership team
